

Endurabond 501 Wash Primer

ENDURABOND 501 Wash Primer

FUNCTION: Endurabond 501 Wash Primer is a solvent-based primer designed to prepare surfaces for bonding prior to applying Endurabond 502 Tack Cement.

TYPICAL PHYSICAL PROPERTIES	Color.....	Clear
	Wt./Gal.....	6.91 lbs.
	Specific Gravity.....	0.829
	Viscosity, Brook-field #2 spindle at 50 RPM.....	20-120 cps
	Non-Volatile Solids.....	25%
	Shelf Life at 78° F (unopened can).....	9 months
	Flash Point.....	Less than 0° F
Coverage-Sq.Ft./Gal./Coat.....	Approx.200-400	

DIRECTIONS FOR USE: Stir prior to use. When Using Endurabond 501 Wash Primer scrub the surface of the substrate with a supplied Scotch-Brite scrubbing pad saturated with the wash primer. Apply the wash primer to an area wider than the actual surface being bonded to insure bonding to primed surfaces

Refer to Endurabond 502 specification for instructions for the next coat.

TOXICITY: Refer to the MSDS Sheet.
